

As active listeners of K-LOVE radio, we are concerned over its potential displacement by a LPFM signal.

K-LOVE serves us as a residents of the Mesa, AZ, by providing music and programming to which we are comfortable listening in front of our, two toddler-aged boys.

If K-LOVE were to be displaced by an LPFM broadcaster providing other programming, we and other listeners in our area would be without the quality programming K-LOVE provides.

While there are other Christian alternatives available, none in our area provide the same quality and have the same national presence.

K-LOVE is able to pool the resources of many areas into an efficient national operation resulting in greater quality programming than other non-commercial, Christian broadcasters can provide.

Therefore, in the interest of the young listening public, I urge you not to let a LPFM signal displace K-LOVE.
